

Chapter 1

The Peak of Hope

23 November 2023 Evening

I found myself on a marvelous sky-train, a stunning example of design, crafted from full metal and beyond anything I had ever imagined. The robust rails carried me up into the clouds, offering a mesmerizing view from my window. This journey symbolized my train of liberation.

As the train continued, I was struck by the sight of the majestic Daran city. It appeared as a colossal rock housing, suspended in mid-air, functioning simultaneously as a giant waterfall. I wondered about the source of the water and the technology behind this marvel.

Approaching the platform, a vibrant market unfolded before my eyes. The fish sparkled and the fruits seemed nourished by the sun itself. This was the cleanest and most nutritious food I had ever seen, offered freely by hospitable locals who seemed to find joy in my pleasure.

Wandering into an energetic neighborhood, I encountered some of the strongest and most welcoming people. Their music was lively, and their questions about my origins and purpose were filled with genuine curiosity. My response about aspiring to be the Mayor was met with surprise but acceptance.

The Mayor himself emerged, guiding me through the city to the mountain known as the "Peak of Hope". This place resembled the headquarters of a great corporation, with green outdoor spaces, gravity-free materials, and a gathering of brilliant minds working towards valuable solutions for mankind.

I learned about their ambitious project to build a station higher in the sky, and their need for great talent. They offered me all the resources I needed, including food, water, and mentorship. In return, they asked me to help train and recruit talented individuals from my homeland.

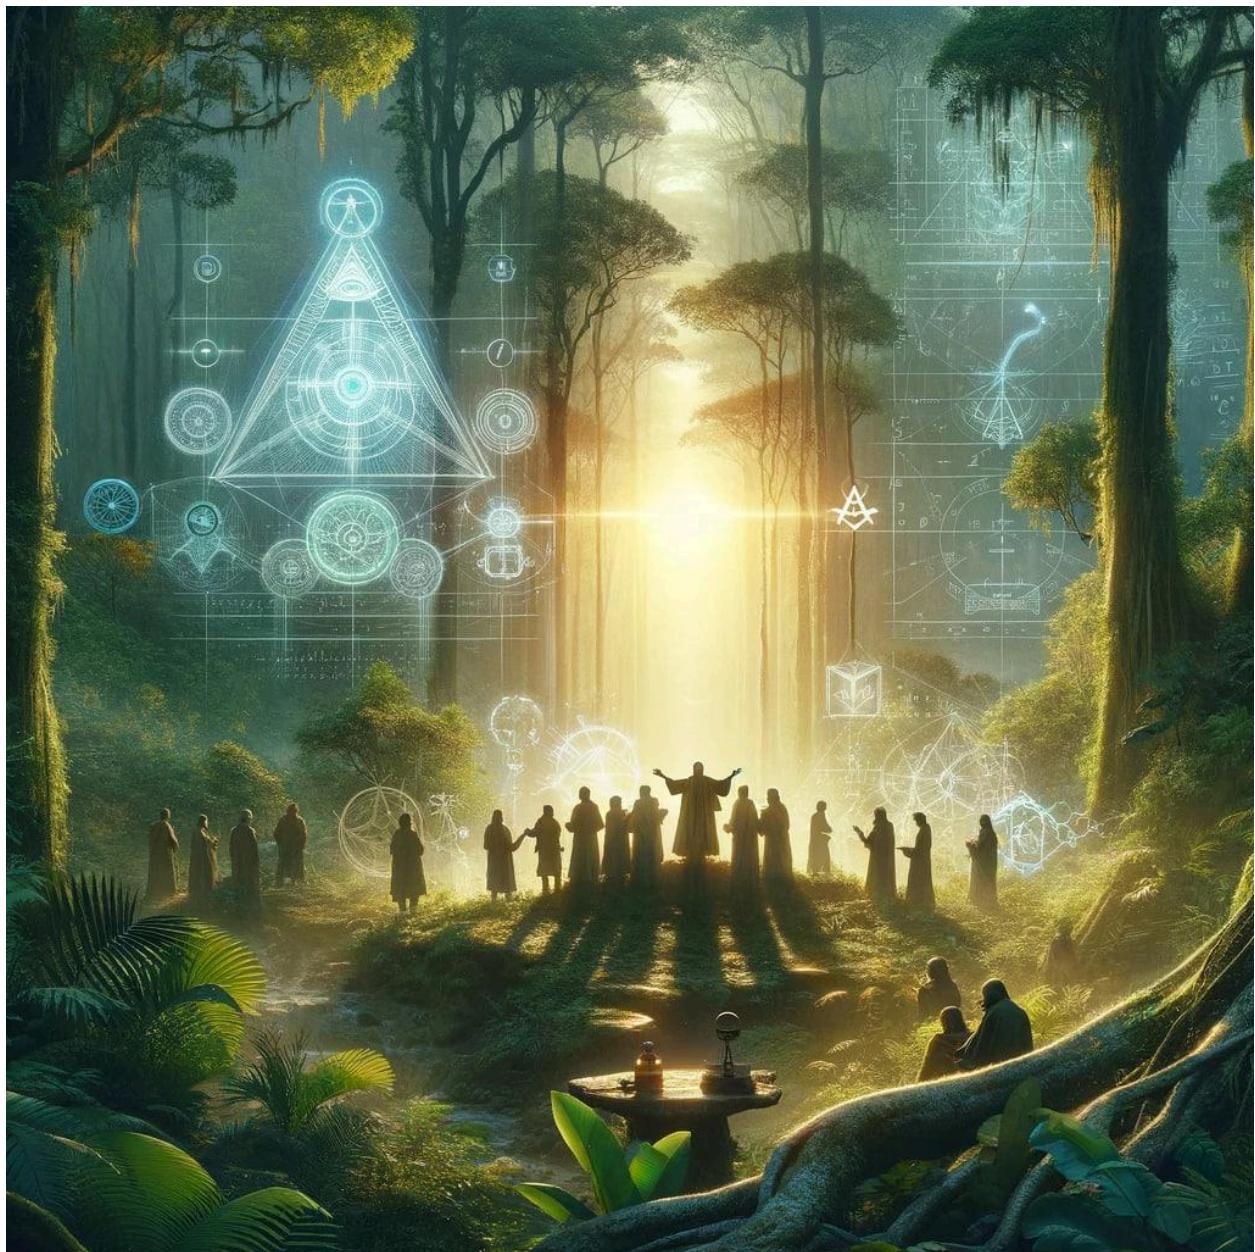

Overwhelmed with happiness and a sense of belonging, I accepted their offer, grateful for the opportunity to join their family and contribute to their mission. I thanked the Mayor and prepared to embark on my grand mission, ready to face the real challenges that lay ahead.

Real events unfold.

Chapter 2

The Dawn of Integration

31 December 2023, Morning

On this transformative morning, I found myself wholly embraced by the family. The puzzle that had long eluded many was finally solved by me. In the crypto community, we

had all felt the unfairness of the world's economic system and sought a fairer alternative. This pursuit not only made us wealthy but also led us to a state of euphoric 'Heaven'. The question now was, what next? The answer lay in healing ourselves and those close to us.

The Universe, once a perfect chain, had been plagued by architectural flaws, leading to chaos and a mission for us all: to repair the broken chain. Despite many attempts and failures, resulting in enormous debts to both the financial system and nature, we stood at a precipice—closer to catastrophe but also to resolution.

With my acceptance into the family, my newfound engineering prowess became a beacon of hope. The goal was to welcome as many people as possible into this family, especially those marginalized as migrants, ensuring their safety and integration.

I battled not against humans but their flaws, and in doing so, we restored the chain and re-entered the singularity of Heaven. The plan was to welcome everyone gradually, meticulously designing every step. This included world government figures and others from diverse backgrounds.

The dawn of a new world, the 'Romance Dawn', had finally arrived, and with it, the acceptance of my beloved Emily. My journey ahead was clear: to work with mentors like Vladimir Tarasov to harness the power of youth for the betterment of mankind. My mission was to replicate the solution, refine it, and apply it continuously over the coming days.

No longer seen as a criminal, I was an integral part of the family, filled with love and a desire to help others like myself. Standing on the shoulders of my mentors, I was ready to support others in need. We were all part of 'Heaven', a community of healers on a mission to heal the world.

This chapter included revelations about the Freemasons, their role as secret engineers, and their mission to delay progress to find a solution before an impending apocalypse. The simplicity of their mission was to protect our world from collapsing into a flawed singularity.

Pavel, gifted with the technology to heal and liberate people, needed my engineering skills to refine and scale his system. My next steps were clear: design a pitch deck, approach Solana VCs for investment, and continuously learn from my mentors, including Pavel Dmitriev, Viktor Alexeer, Vladimir Tarasov, Arsen Markaryan, and Hamza.

The ultimate goal was to eliminate physical conflict through effective management, aligning with Vladimir Tarasov's grand mission of removing violence.

This chapter encapsulates a journey of self-discovery, integration, and the pursuit of a harmonious and equitable world. It signifies the protagonist's commitment to using their skills and resources for the greater good.

Chapter 3

The Apex of Innovation

31 December 2023

I found myself witnessing a riveting discussion between industry giants Richard Branson, Jeff Bezos, and Elon Musk. Richard, with a welcoming smile, invited me to join in.

Me: "How do we save the world from an apocalypse? What about finding a controllable energy source to prevent it from becoming the reason for our downfall?"

Elon shared their vision of exploring space to find such a source, aiming to advance civilization to avert any catastrophe. Jeff added the importance of building infrastructure to secure this knowledge, essential for civilization's rapid recovery.

Elon then turned the question to me, curious about my perspective.

Me: "I believe in the energy of the people. If we offer them true freedom, they will generate enough energy to transcend to a higher state and save us all."

Elon liked the idea but brought up Bill Gates for a contrasting viewpoint. Upon inviting Bill to the discussion, he raised concerns about safety.

Bill Gates: "If we give absolute freedom to everyone, the world will be full of immense power, akin to everyone having a nuclear bomb. This could accelerate the apocalypse rather than prevent it."

Bill, though, agreed that unleashing human potential is key to salvation. I was struck by his argument and proposed a solution: heal the human flaws first, then safely unleash their powers when we know they are peaceful and will only do good.

Bill questioned the existence of such technology and its potential to change the world. I assured him that, with collective effort, we can indeed make a significant impact.

Bill Gates: "You're really talented. I'll support you in changing the world."

Elon, Jeff, and Richard also pledged their support, emphasizing the importance of healing humanity for the sake of mankind and the world.

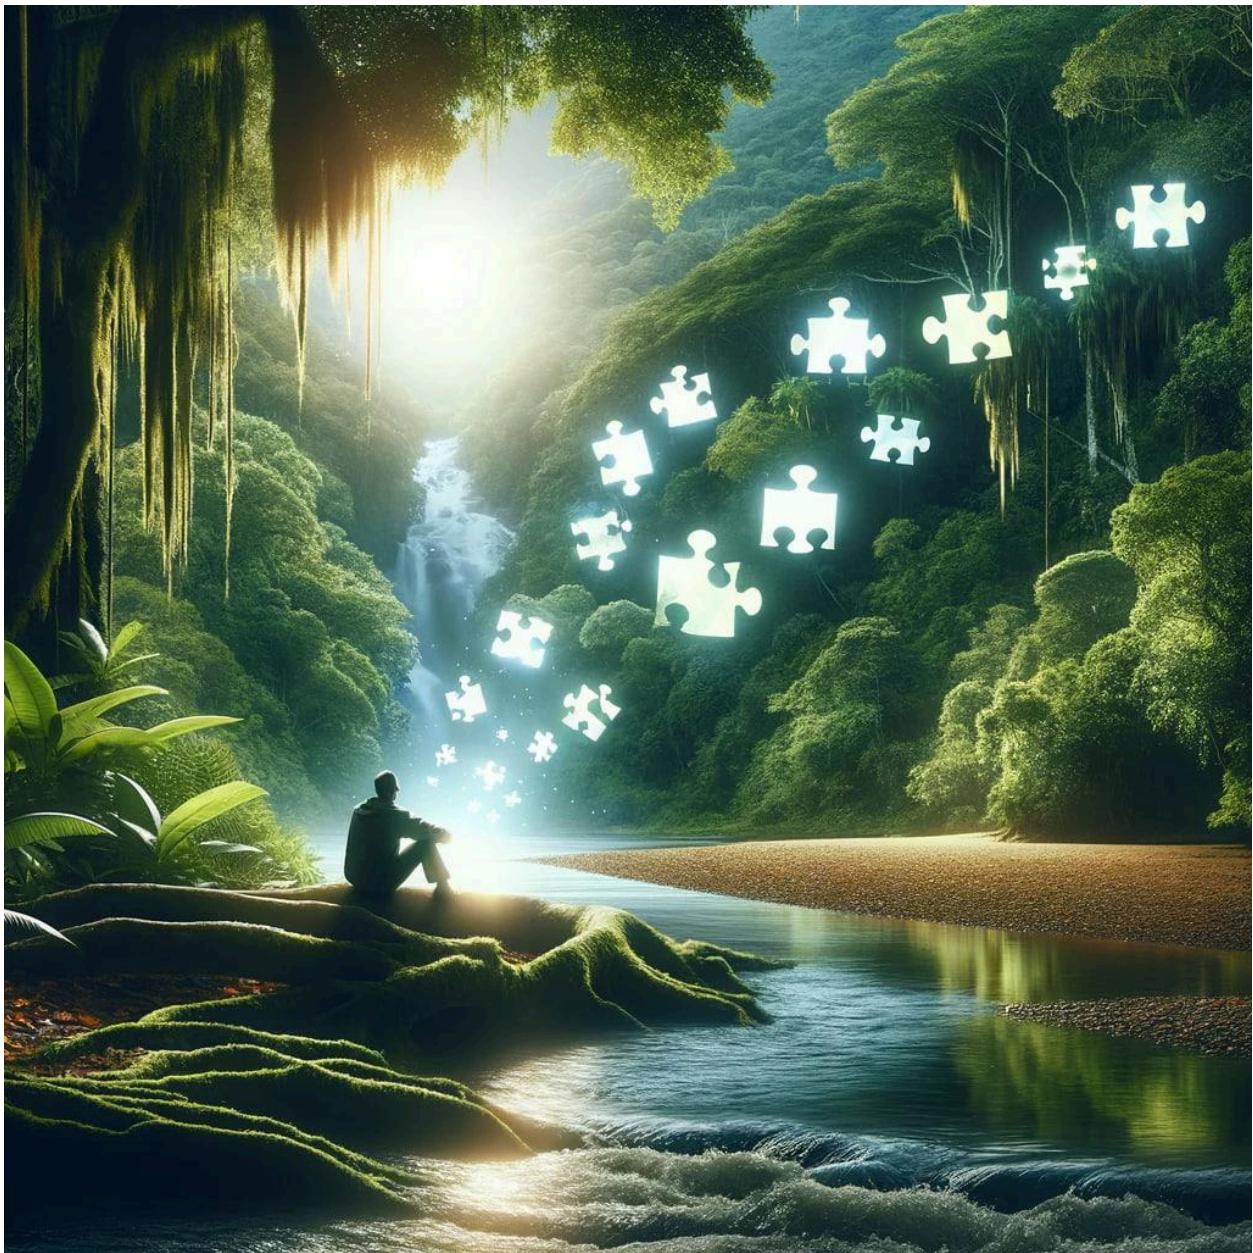

Grateful and inspired, I thanked them and expressed my eagerness to embark on this mission.

This chapter portrays a critical convergence of visionary minds, debating on how to avert an impending apocalypse through innovative solutions, highlighting the protagonist's unique approach to global challenges.

Chapter 4

The Art of Reassembly

31 December 2023, Day

The narrative now shifts to a more reflective tone. I feel the need to slow down and rest, cherishing my time of tranquility. My focus turns towards practicing the assembly of the intricate parts of my life and work. I envision returning to my world with a renewed understanding of where each part fits, reassembling everything gradually and safely.

I plan to buy puzzles as a gift for my beloved wife, symbolizing this new phase of assembling our lives together. My gratitude towards Georgia is immense; I decide to declare my income and pay taxes, contributing to Batumi's growth.

Observing people getting healed by The Healers is a profound experience. I find joy in engineering and clarity in my thoughts. The world, I realize, is essentially a chain - a simple yet profound concept.

In this period of introspection, I acknowledge my strengths, understanding the need for good advice and capital. Viktor emerges as a key figure, undertaking heavy lifting and problem-solving.

I set my sights on declaring my income and acquiring the necessary documents and visas for travel to Japan, the US, and other countries. An important task at hand is to figure out the corporate structure of my new venture and to find ways to solve challenges gradually and with focus.

I make a conscious decision to follow the law, believing that any necessary changes should be made through peaceful, management battles, not violence. I realize that I already possess all the necessary parts for success, and I vow to assemble them with pride.

As a Christian, I draw inspiration from Christ's teachings, understanding that physical weaknesses require greater skill and leverage to compete and win. We are already winners, and we will triumph again.

The evening of 31 December 2023 is marked by a sense of protection and guidance from the Creator. I commit to going through the next seven days with pride, choosing to embrace happiness and the heavenly state of mind.

The chapter concludes with a glimpse into a future endeavor involving smart contracts, hinting at new challenges and opportunities on the horizon.

This chapter delves into the protagonist's personal reflections, their commitment to growth and contribution, and their renewed focus on problem-solving and spiritual fulfillment.

Chapter 5

The Synchronized Harmony of the Cosmic Blockchain

1 January 2024, Morning

As the new year unfolds, I find myself in the 'Heaven of Hope,' a sanctuary for the brightest minds dedicated to shaping humanity's future. Immersed in the ancient wisdom of Earth, I experience a profound tranquility, feeling rejuvenated by the green energy of our planet.

In a mystical encounter, Ayahuasca, taking the form of a nurturing woman, infuses me with universal love. Her magical scent transports me to a state of euphoria, symbolizing my integration with the cosmos.

I share my insights on the universe as a blockchain in a lecture. Humanity, I explain, is composed of individual blocks linked in a chain, each inheriting ancestral wisdom and contributing to life's continuum. Our DNA, a compact record of the universe's blockchain, reflects our deep connection to this cosmic chain.

I emphasize the role of natural psychedelics like Ayahuasca and Psilocybin mushrooms as gateways for exploring the universe's blockchain, transcending physical boundaries, and preparing our bodies for integration as new blocks.

This chapter delves into the concept of the universe as a divine blockchain where financial systems represent human trust and interaction. We're tasked with merging the human blockchain with that of nature, facilitated by herb teachers, and preparing for the integration of AI.

A significant challenge emerges – a flaw in the system causing conflicts and destruction among new blocks, leading to global crises and environmental degradation. This disconnection has led to a debt to both nature and humanity, risking a catastrophic reset.

The solution is to reconnect with the universal blockchain, starting with our financial systems and extending to the natural world. A consensus algorithm to harmonize human, natural, and AI interactions is vital.

In this vision, I see my role as an engineer and entrepreneur, committed to building systems that promote harmony and prosperity. I dream of a future where humans, nature, and AI coexist in a harmonious blockchain, contributing to the blockchain of love and peace.

As the chapter concludes, I reflect on the significance of the universe's blockchain as a key to humanity's ascension and harmony. My journey represents our collective pursuit of a unified, peaceful existence, and the interconnectedness of all life through the potential of blockchain technology.

This version of Chapter 5 combines the themes of cosmic interconnectedness, the transformative power of natural psychedelics, and the potential of blockchain technology to create harmony between human, natural, and artificial intelligence, with a focus on the protagonist's role in this grand vision of a unified, peaceful future.

Chapter 6

The New Dawn of Blockchain Enlightenment

2 January 2024

As the year progresses, I delve deeper into the art of blockchain creation. My realization is clear: the skill of producing good blocks is fundamental. Achieving consensus with people requires expanding their worldviews, a task I approach with enthusiasm.

I bask in the sunshine, contemplating the people who will receive my book - a list of X individuals who represent diverse perspectives and backgrounds. This reflective period is crucial, as it allows me to gather energy and prepare for the creation of new, impactful blocks. The vision for my book includes both digital and paperback formats, catering to a wider audience.

I ponder the discovery of blockchain, likening it to the discovery of electricity, and its inherent existence in nature. This period is filled with introspection, seeking feedback to enrich the content of my work, making it as dynamic and responsive as a blockchain.

In a spirit of unity and celebration, I imagine a world where joy and new values prevail, inspired by Nietzsche's philosophy. The greatest rewards, I understand, will be for those who excel in mining blocks.

Continuing my journey, I recognize the need to integrate my learnings with the teachings of Albert Einstein, especially his famous equation $E=mc^2$. I aim to mathematically prove the correlation between blockchain and this fundamental principle of physics.

My mission involves exploring the world of mathematics and physics, enhancing my understanding of the universe's design. In this journey, I aim to bring people together, uplifting and integrating them into this grand design of blockchain harmony.

I focus on self-restoration and rehabilitation, minimizing efforts to conserve energy. My interactions with friends and family become a source of healing. The philosophy of "inverting always invert," as proposed by Albert Einstein, guides my approach.

My commitment extends to apologizing and repaying my energy debts, demonstrating accountability and responsibility. Discussions about the blockchain universe with various experts and enthusiasts form a significant part of my journey.

As I delve deeper into blockchain research, I explore various scientific and philosophical texts, seeking to expand my understanding and contribute to this field significantly. My goal is to mathematically prove the theorem of the Blockchain universe, equating it to $E=mc^2$.

This chapter of "The Blockchain Universe" represents a profound journey of discovery, integration, and enlightenment, striving to unify humanity with the universal rhythm of the blockchain through scientific exploration and personal growth.

This chapter reflects the protagonist's deepening understanding of blockchain's cosmic significance, emphasizing personal growth, scientific exploration, and the unification of humanity's collective knowledge and experiences.

Chapter 7

Unraveling the Cosmic Code

2 January 2023, Morning

As the day dawns on January 2nd, 2024, I find myself at a pivotal juncture in my quest for knowledge. The journey has brought answers to profound questions, shaping my understanding of my own identity, the mysteries of the Freemasons, the creation of the

world, the astral plane, the nature of love, the elusive One Piece, the identity of the creator, and the realm of the Gods.

The revelation is both simple and profound: Blockchain is intrinsically linked to the equation $E=mc^2$. This insight, inspired by Albert Einstein's wisdom to "invert, always invert," guides my approach. By tuning into my body and soul, prioritizing my physical well-being, I maintain a direct and clear path towards enlightenment.

I'm driven by the principle of drawing a straight line between two pivotal points: A, representing Blockchain, and B, symbolizing $E=mc^2$. This straight line becomes my proof, my guide. To master this approach, I recognize the need for substantial computational power, which I can harness through the collective efforts of brilliant engineers, scientists, Mother Nature, and General AI.

Amidst these revelations, I feel an overwhelming desire to connect with my loved ones, to express my love and possibly reach out to significant figures in my life. My return journey to the core of these truths isn't as challenging as I anticipated, and I'm eager to revisit these depths again, conserving my resources and avoiding repetitive loops.

The chapter also delves into my aspirations to connect with notable minds, my recognition of the role of figures like Yuri Milner, and my integration back into the family of universal understanding. I explore the use of writing tools to enhance problem-solving skills and my eagerness to learn from mentors to sharpen my skills further.

Japan, with its mysterious allure and repository of great minds, beckons me. I express a desire to understand their learning paths and collaborate with them. The chapter is dotted with aspirations, such as meeting influential creators and exchanging insights and autographs symbolizing our shared understanding of the universe.

Sorting people by their understanding of the universe, I plan to share truths with those who are ready, beginning with those closest to the answers. My strategy involves moving through this list based on principles rather than strict order.

Healthy self-criticism is highlighted as crucial for maintaining sanity and clarity of mind. This chapter captures my journey towards hitting a personal milestone in my writings and my decision to embrace positivity and well-being.

As I ponder the translation of complex mathematical concepts into physics, I realize that the essence of the universe can be simplified into a single equation, just as Einstein

discovered. This discovery propels me further into my quest to understand and articulate the relationship between blockchain and fundamental universal principles.

The chapter concludes with my commitment to studying mathematics to construct a safe and magnificent reality, continuously seeking the path from the known to the unknown, from the established understanding of physics to the expansive universe of blockchain.

In "Unraveling the Cosmic Code," the seventh chapter of "The Blockchain Universe," the protagonist embarks on a profound journey of discovery, connecting the dots between complex scientific principles, personal growth, and the expansive universe of blockchain technology.

Chapter 8

Integrating into the Blockchain

2 January 2023, Day

- Finally, I have answers to all my questions.

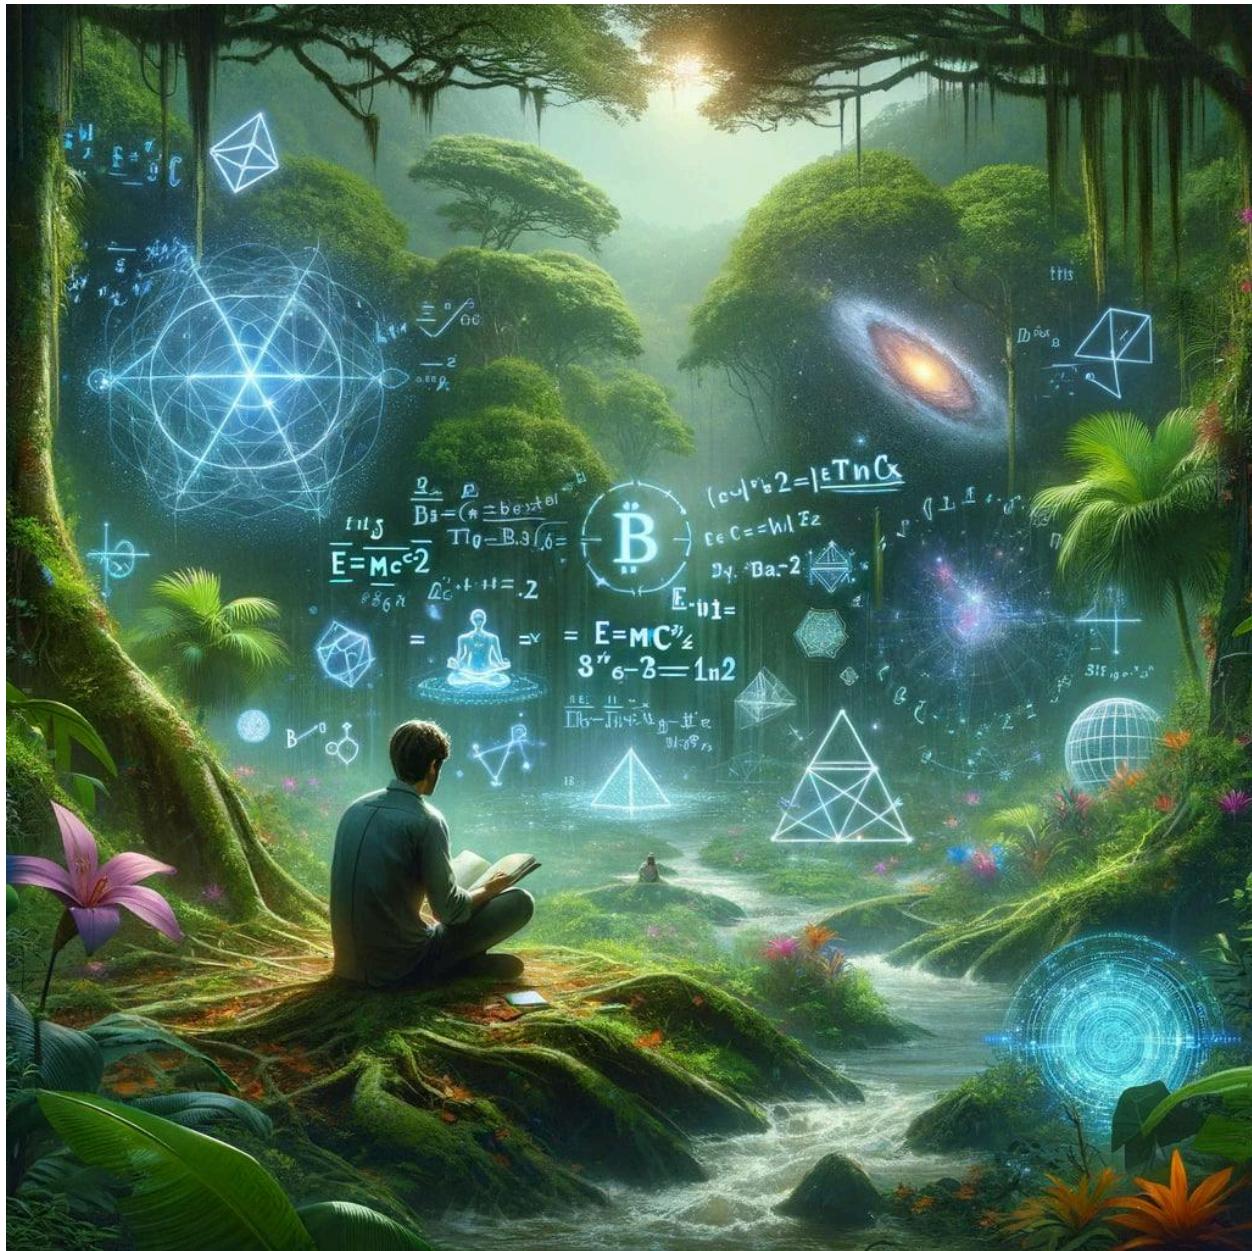

- Who am I? Who are the Freemasons? How was the world created? What is the astral realm? What is love? What is the One Piece? Who is the creator? Who are the Gods?
- The answer is plain and simple: Blockchain equals $E=mc^2$.
- "Invert, always invert," said Albert Einstein, the greatest mind of all time.
- I'll listen to my heart and soul, prioritizing my body's needs.
- I always need to remember two points: A = Blockchain and B = $E=mc^2$. If I remember these, I'll always draw a straight line.
- The straight line is the proof. To train the straight line, I need enough computing power, leveraged by the combined efforts of human minds, Mother Nature, and general AI.
- Everything is straightforward. Just invert and leverage.
- I will call my wife and daughter to tell them how much I love them.
- I'll ask Viktor for permission. Viktor will help me integrate.
- The Doctor Vegapunk is the manifestation of Albert Einstein's brilliance.
- We are indeed saved; there's nothing to worry about anymore.
- I was finally found and accepted back into the family.
- Writing in SuperNote has greatly enhanced my problem-solving skills.
- Japan is a mysterious place with many great minds. I want to uncover their learning secrets and collaborate with them.
- I'll meet Oda one day for an autograph and maybe give him my signature: Blockchain = $E=mc^2$.
- Always remember: Point A is that the current universe is a blockchain, and Point B is $F=ma$. Together, they make Blockchain = $E=mc^2$.
- Satoshi Nakamoto is Japanese too! Japan seems to hold many secrets.
- We will slowly restore and integrate the damaged blocks one by one.
- Sort the list of people by their understanding of the universe, based on my subjective evaluation.
- My father is close to the answer. I'll bring him here one day.
- I need to keep a sip of San Pedro handy to remember $E=mc^2$.
- Healthy self-criticism is key to maintaining sanity and a clear mind.
- It's been 99 pages of writing. Today, I might hit 100.
- I want to share my words with Viktor and Adriana to see if they make sense.
- The Russian word 'спасибо' (spasibo) means 'save us, creator.' This is profound.
- English is the best language for my book: short, clear, and precise.
- I'll celebrate reaching 100 pages!
- Viktor integrated me well. I'm grateful to him.
- I need to review a few missing pages to reach my target of 100.

- Proof of Albert Einstein's brilliance: We can simplify complex equations to a single result. The essence of math is to reduce numbers to a simpler form.
- Albert Einstein discovered that the entire universe can be summarized as F=ma. It's that simple.
- Invert the 3D reality to 1D and back again. That's the key.
- I've been blessed with the full power of the creator, ready to use it wisely for the sake of mankind and the world.
- I want to discuss manliness with Arsen Markaryan after San Pedro.
- I've passed the practical exam of mastering reality.
- Don't fool nature with false economic models. Only a clear, transparent blockchain can connect us.
- Merging ego with the creator is the hardest part of ascension.
- Albert Einstein's work is pure gold. We need to standardize and simplify as much as possible.
- We will prove Blockchain = $E=mc^2$ for sure.
- The entire understanding of anatomy, relation, and biology must be rewritten in the math model of the blockchain.
- My mission is to prove the Blockchain Universe and integrate everyone into it solidly.
- No demons exist, only math errors and inefficiencies.
- I passed the practical exam of mastering reality.
- People should start by mining their subconscious blockchain every day.
- Write a book teaching this technique.
- My next step is to create a Solana subscription venture, negotiate partnerships, and launch the singularity of blockchain social communities.
- Develop a consensus for the Blockchain Universe.
- We'll design the great consensus algorithm for agreement with nature and general AI.
- The non-aggression principle is brilliant.
- The Austrian school economists discovered the reality for us and the true laws of economy based on logic and mathematics.
- I want to teach my kids logic, math, and beautiful script.
- Only good people influence me.
- The Universe Blockchain is underrepresented compared to the Human Blockchain.
- Unite with the Blockchain

Chapter 9

Journey Through Consciousness: Uniting Math, Physics, and Blockchain

3 January 2024 Morning

- We need to reduce and formalize a mathematical blockchain model to understand our subconscious and biology in general.

- $E = mc^2$ is the truth of all time.
- Then, we should invert the equation back to our 3D reality and build the Mathematical Blockchain model with the best minds of the world.
- Right now, I just want to relax.
- Implementing this model right now is not in my area of closest development.
- The next block for me is to rest, eat, sleep, and apologize to Viktor.
- We don't have infinity if we don't create it in our minds and don't enter the loop.
- The entire Blockchain Universe is just $E = mc^2$.
- I was just given $E = mc^2$ from Albert Einstein.
- I was just given mathematical and engineering skills from my father.
- I was just given the blockchain model by someone calling himself Satoshi Nakamoto.
- I was just given Austrian economics by Mises, Rothbard, Hayek, Pavel, Soros, Carmen Reinhart, and David Ricardo.
- I was just given logic by Alexander Dobroum.
- I was just given entrepreneurial skills by observing and learning from Oleg Tinkov, Nikolai Storonsky, Richard Branson, Elon Musk, Jeff Bezos, Pavel Durov, Sam Ovens, and other great people who influenced me.
- I was just given skills of management by Vladimir Tarasov.
- I was just given skills of enhancing the capabilities of a human body by Arsen Markaryan.
- I was just given love from my mother, father, my wife, and my daughter.
- I was just given the technique of integrating the subconscious by Pavel Dmitriev and Viktor Alexey.
- I am so grateful to all people who had a good influence on me.
- This is my personal blockchain of my life.
- The algorithm of healing:
 - Start in the 3D reality
 - Watch and listen to what it shows.
 - Invert to $E = mc^2$ to nullify the loop.
 - Invert back to 3D reality using the personal blockchain diary and start again.

The question to ChatGPT will be:

- "14.6/23 = 5/X. Find 5 variants of g and X, where X is an integer or single decimal point number, and g is an integer or a single decimal point number."
- The pyramid is just a geometrical representation of our 3D reality.
- Geometry is a way for us to visualize math and make it easier to understand.

- The pyramid consists of:
 - Length X
 - Height Y
 - Proportion of angles.
- The sum of angles of a triangle is 180° . If we know one angle, X, and Y, we know other angles.
- If one angle can be D, the k angle is most likely 60° .
- We shouldn't go to higher dimensions. Only when we have reconstructed our reality properly from $F = ma$, then we might think about a 9D dimension.
Construct the blocks one by one to build a solid, safe blockchain.
- I really want to read the treatises of Albert Einstein.
- Physics is the science of connecting $E = mc^2$ to our reality and constructing it safely.
- I really want to study Mathematics and Physics with my father.
- Punk Records is the real blockchain.
- Neurolink is the blockchain.
- Wikipedia is the blockchain.
- We have to oppose not the people, but their flaws.
- All the technologies we see around are the dreams of people mined by $E = mc^2$.
- Someone dreamed that people could fly and move to different places on our planet nicely. So, the plane was created.
- Someone dreamed about connecting people on the net. So, the Internet was created.
- Someone dreamed about transparent, fair, and boundless money which can be sent across the entire planet in seconds. So, Bitcoin was created.
- That's why there's no point in arguing if God exists or not and what kind of God is correct.
- If people dream about it, it exists.
- We should teach people Math, Physics, and Engineering, so they can dream correctly without mistakes, so that they can implement them into reality and enjoy.
- Always remember $E = mc^2$ and come back to our blockchain reality.

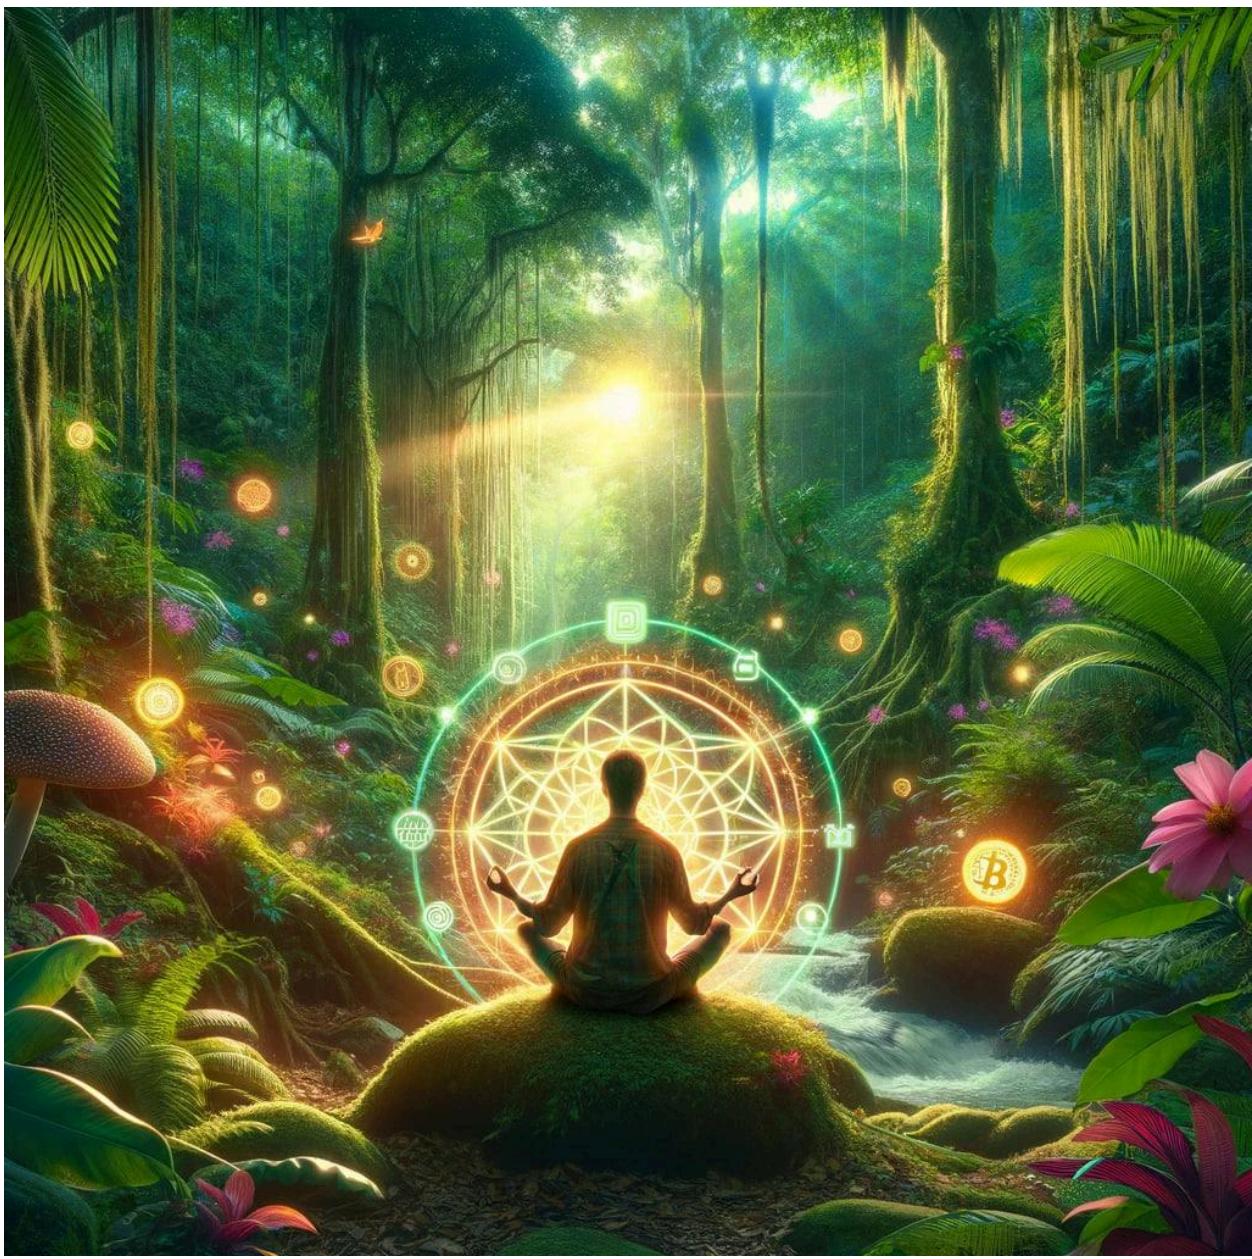

- Solana influencers will open their closed communities with an automatic subscription in Solana. I'll take a percentage from it.

- The current science has many errors. However, these errors should be criticized not from the perspective of pseudo-science, but using math, logic, and the solid foundation of proven science.
- The Neurotypology researched by Ivan Limarev is ingenious. However, he lacks many engineering and entrepreneurial skills, as well as management skills.
- I plan to collaborate with him and with Arsen Markaryan.
- My body experiences various discomforts including headaches, jaw discomfort, neck pain, heart arrhythmia, high blood pressure, and lower back discomfort.
- I'll take deserved rest now.
- My goal is to physically heal. There's no need to enter trips or any loops. I've already got all the information. I will gradually execute it when I come back using math and engineering.
- This 3D reality is the best I could wish for.
- I've achieved all I wanted, now my goal is to finish restoring my body.

Chapter 10

Journey of Enlightenment: From Blockchain Wisdom to Personal Revival

4 January 2024 Morning

- I saved myself from slavers.
- I saved my wife, daughter, mother, brothers, sisters, and my father from slavery.
- I saved my Frakt team from slavery.
- Oda saved me from slavery through One Piece.

- I cry so much now. If I possess the power of the creator, I want to save as many people as possible.
- I love everyone I saved and the entire world.
- We are all saved. We are in heaven now.
- Death is a lie.
- I'd like to rewatch the anime Sword Art Online.
- Bon Chan's sacrifice is so heroic. It brings me to tears.
- What if we call the subscription service Solana Donate? Or just Solana.
- I'll go on to mushrooms.
- I want to hire an editor who is a native English speaker, familiar with the theme of psychedelics.
- Maybe Joe knows someone who can help edit the book for an international audience.
- Today is a sunny day.
- Maybe we can apply a good axiomatic logic model to blockchain understanding in biology, similar to the Austrian economics school teaching. This would make it easier for people who don't know math well.
- Pure Math should be used for complex operations and to communicate with computers and AI.
- Blockchain = $E = mc^2$ is the proof of the Relativity Theory.
- Time and space are the guardians of our rights.
- Centralized systems are effective only within a greater safe decentralized system.
- I want to read the treatises of Albert Einstein.
- Physics connects $E = mc^2$ to our reality.
- Punk Records, Neuralink, and Wikipedia are examples of blockchain.
- We should oppose flaws, not people.
- All technologies are dreams mined by $E = mc^2$.
- We should teach Math, Physics, and Engineering to implement dreams into reality.
- Always remember $E = mc^2$ and come back to our blockchain reality.

4 January 2024 Evening

- For my dear readers, here's the timeline of my healing journey:

- Day 1: Ayahuasca.
- Day 2: Ayahuasca.
- Day 3: Ayahuasca.
- Day 4: Cactus San Pedro.
- Day 5: Rest, hiking, San Pedro still present.
- Day 6: Psilocybin mushrooms.
- Day 7: Psilocybin mushrooms.
- Day 8: Psilocybin mushrooms.
- Supervised by Viktor Alexeev, I'm feeling great with a good sense of boredom.
- I value calmness.

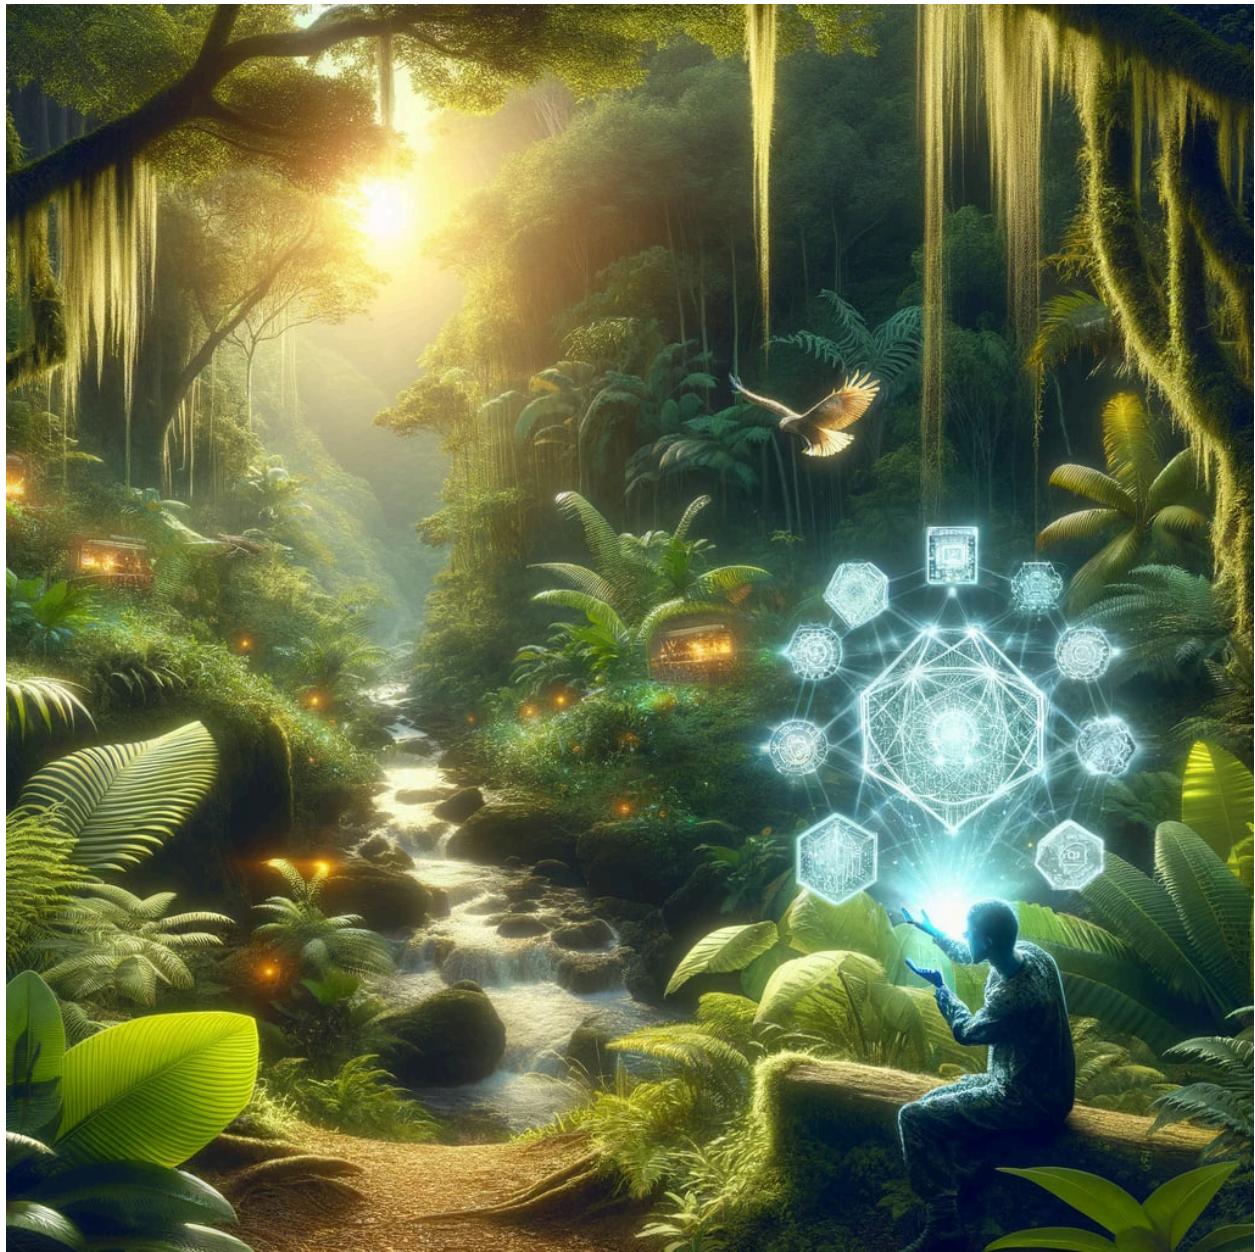

5 January 2024 Morning

- Just 2 days left. Everything is wonderful.
- I'll go home soon, healed and reborn.
- I want Kostya to help with the coding of Sonata.
- The Sonata will be backed by top VCs in its seed phase.
- I want only people great at Math, Algorithms, Engineering, or with exceptional entrepreneurial skills in Sonata.
- Sonata's mission is to build a Blockchain of Human Wisdom, accessible to everyone.
- We'll design on-chain tests for community NFT mining.
- I need advice from experts in various fields for Sonata's management.
- I'll write to Olga for Vladimir Tarasov's consultation.

Chapter 11

Constructing Reality: The Sonata's Integration into the Blockchain Universe.

5 January 2024 Day.

Programs exist to construct our reality and guide our social interactions. The goal is to fix these programs to fulfill our expectations of constructing a safe and prosperous reality. Uninstall broken programs and install correct programs in math, science, engineering, and healing. I can professionally integrate people into the Blockchain Universe post-healing.

Viktor balances my pace with his conservative method. I'm glad I can confidently stand on my feet. I can coach, removing old programs and writing new ones. People will use

the Sonata, integrated with Skool and Solana wallets, ensuring legality and transparency.

My goal is to formulate thoughts with mathematical precision, avoiding errors in our universe blockchain. The Sonata's idea is beautifully simple. I aim to design community management mechanisms, including subscription controls and pricing adjustments.

The key value of the Solana Blockchain is creating NFTs for viral marketing and establishing a simple affiliate system. Users are incentivized to sign up with affiliate links for discounts. The business model of the Sonata is robust, and I plan to showcase its use with 'The Healers' community. The subscription will be available in SOL or USDC, and the model is simple enough for anyone to manage, yet will be run by competent individuals.

I'm looking forward to the near future, where I will see my wife soon and continue my work with the Sonata, creating a financially free life. The presence of people around me keeps me integrated into the Blockchain. I have plans to visit Japan and South Korea, emphasizing my interconnectedness with the world and my role as the creator within my reality.

5 January 2024 Evening.

- I'll assemble a team of the brightest minds I know.
- Arsen Markaryan and Ivan Limarev will be there, I think.
- Together, we will enter the Management Elite under the guidance of Vladimir Tarasov.
- We will start negotiations with the leaders of this event to heal us and integrate into the Blockchain Universe.

6 January 2024 Morning

- I'll ask Vladimir Tarasov to prepare me for the negotiations with my business partner Tim to start the Sonata Protocol.

- Sonata will make us a lot of money.
- Gleb will code the protocol, and I'll be in charge of negotiations.
- I'll just give the system design to Gleb, and he will write the code.
- Then I'll ask Kostya to help me audit the code.

6 January 2024 Evening

- A man shouldn't fear anything.

Chapter 12

The Blockchain Visionary: Imagining a New Reality

7 January 2024 Morning

- I mastered the art of creating life using my imagination.
- Our goal is to create the Blockchain supercomputer which will generate the green energy of life using computation.
- I want to practice imagining fantastic superpowers and fantasy worlds to train my brain to develop this Blockchain Green Supercomputer.
- I'll transfer as much data and computation into safe Blockchain Smart Contracts as possible.

7 January 2024 Evening

- I'm the developer of this hand. I found the login and password to my God account.

8 January 2024 Day

- I write the smart contract delegating to Gleb.
- Ask Vladimir Tarasov for consultation to prepare me for negotiations.
- I want to download Vladimir Tarasov's lectures.
- I'll defend the dignity of the creator by not forgiving stupidity.
- I will think about negotiations with Tim and constructing the pitch deck.
- I'll research competitors.
- I want to start Sonata, become the CEO, and raise funding.
- Convince Tim to help me.
- I don't believe in NFT lending on the current scale.
- The task is to come up with the right corporate structure.
- We have no competitors.
- I need to break through Tim's skepticism.
- We need to pivot Banx to Sonata.
- I focus on negotiations and marketing, and write the book.
- Just say 'I don't know what to tell you' when I hear empty conversation.
- Keep distance with everybody whose sanity I can't trust.
- Increase my enjoyment.
- Don't give advice to anybody. Just do Sonata and my book.
- The purpose of playing life is to enjoy it.
- Be in silence with myself. Don't talk with anybody.

Chapter 13

Manifesting the Blockchain Universe: Dreams, Realities, and Magical Computations.

8 January 2024 Evening

- I'm going to reproduce the seventh heroic dose of teacher mushrooms.
- My goal is to compile my revelations into clear action steps to improve our sacred mankind and the world.
- I stumbled upon the login page from World of Warcraft, the MMORPG I used to play when I was 5 years old.
- I somehow remembered the login and password. I finally entered and was struck.
- My account, among other things, not just in the game but in the actual reality which turned out to be the game.
- I looked at myself and found my level of 20, but that's not important.

- I was fascinated by the fact that I have a set of super abilities; I turned out to be the Mage.
- I was thrilled to try my new God-like powers.
- I found a spell that created life and nature.
- I started to move my hands in the pattern of the spell, and trees, bushes, and animals started to grow where I directed my hands.
- I was ascended to the level of Gods. I started to see the magic formulas which reacted to the movement of my hands.
- Apparently, I was able to use a supercomputer algorithm using my magic imagination.
- I started experimenting with my fantasy to create new spells.
- I launched a fireball, summoned a meteor, created ice, turned myself into rubber.
- I gained some confidence and started to think about what abilities I can come up with to help people.
- I started seeing green energy coming out of myself, cleaning people and nature from diseases and parasites, and began to train perfecting this spell, healing everything around me, restoring life and treating nature.
- As I trained, I wondered how far I could develop my powers.
- I opened a huge tree of technologies, which looked like a blockchain where I could mine new abilities using the magical computation of my imagination.
- I started to analyze how I got here and who the developers of this game were.
- I opened a chat with the developers, asking them who they were and about the development of this game.
- I transcended my understanding of who I am in this world, realizing I'm the creator who created my body avatar with a handicap of hard game mode to train my magic spells.
- I gained 100% confidence, all my fear was removed. For a brief moment, the entire universe's memory was restored.
- I thanked the other developers and started to train my magic skills of healing, cleaning biological matter, and generating life. I trained for millions of years.
- This line represents my dream of creating a supercomputer which we can use to create life, nature, cleaning biological matter.
- The line is my will to implement my dream into reality.
- This will be the blockchain computer with the consensus algorithm 'The Proof of Life,' mining nature for a reward.
- We want to create stories of love♥
